

Prof. (Dr.) Chowdhury M. Hossain, Principal, BST, published his postdoctoral research in a very prestigious scientific open-access internet journal edited and peer-reviewed by “*Nature*” with Diamond lab research group in University of Florida, USA regarding the discovery a new antifungal drug. Systemic fungal infections are hard to treat and if you get one, the risk of death is high. Resistance to current antifungals is ever increasing, so development of new antifungals is crucial. This study was funded by the *National Institutes of Health, USA*. To view the paper, click the link: <https://www.nature.com/articles/s41598-017-04462-6>
